Convert File Conversion actionsPPTView other document file formats Technical details A large part of any presentation is how text enters, appears, and exits the screen. The entry, emphasis, and output of items on a slide itself are controlled by what PowerPoint calls Custom Animation Transitions. They can be animated in a variety of ways. For example, you can customize the animation to create small story boards by anidating images to enter, exit, or move. With different types of explanations, speech bubbles with edited text can be sent on and out to create speech. The overall design of a presentation can dictate how all other slides appear and work, it's called the master slide. Everything from the design to the text on the slide can be edited using a primitive outliner.
